

# *Liberty Goes Back to Nature to Give Back*

On Friday June 28th, 2019 the Liberty team spent their morning volunteering at Schlitz Audubon Nature Center. We were tasked with removing the invasive species, Dame's Rocket from areas around the center. While this purple, pink or white wildflower may look pretty, it contains an abundance of seeds per plant and spreads rapidly wreaking havoc on the natural environment. In order to control it, the entire plant, including roots and seed pods, must be pulled, bagged and disposed of.

The LFG team enjoyed getting some fresh forest air and banding together to help the nature center remove this rioting plant.
