

This user guide will demonstrate how to add connected and manual accounts.

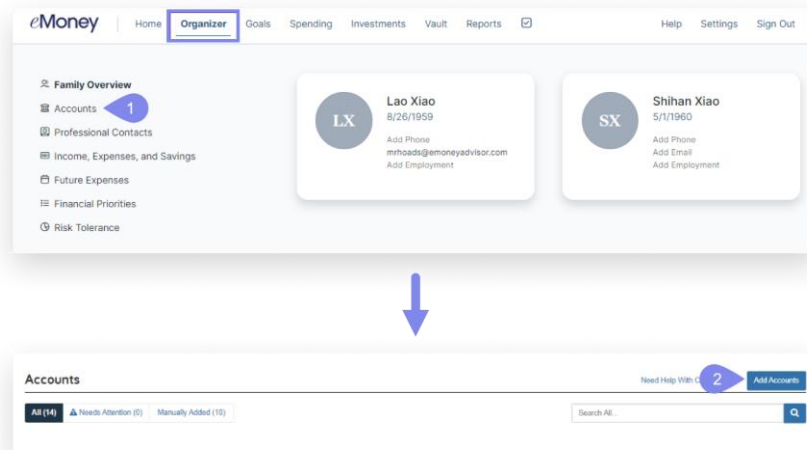

Adding Connected Accounts

Establishing connections to your personal banking institutions will allow your account information to be updated automatically. You can enter your account holdings manually if you do not have an online login to an institution.

1. From your Home page, click Add Account.

You can also click **Organizer** in the menu, click **Accounts**, and click **Add Accounts**.

2. Click **I have an online login to this account.** (Manual entry is explained in the next section.)

Go back to Accounts

Add Accounts

Do you have an online login to your account's institution?

3. Enter the name of the institution or website address, then click **Search.**

Go back to Home

Add Accounts

Enter your institution's name or website address

Sample Institution

Can't find your institution?

Some accounts don't have online access. To add those accounts, you will need to use a form to fill out the information.

4. Select the connection from the search returns.

8. Johnson Bank	18. Alerts Bank
9. FirstTrustBank - Via Direct Web API	19. Day City Bank
10. Bank of America	20. CFC - Bank of America (M except CA, WA & CO)

Can't find your institution?

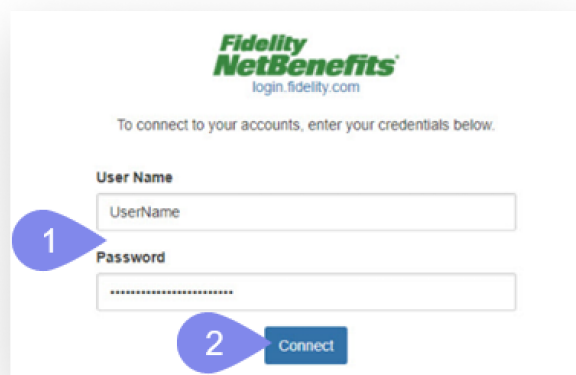

Some accounts don't have online access. To add those accounts, you will need to use a form to fill out the information.

5. If an Acknowledge Institution Notice screen appears, read the notice, and click **Continue**.

This notice varies by institution and will inform you of any critical information related to this institution's connection.

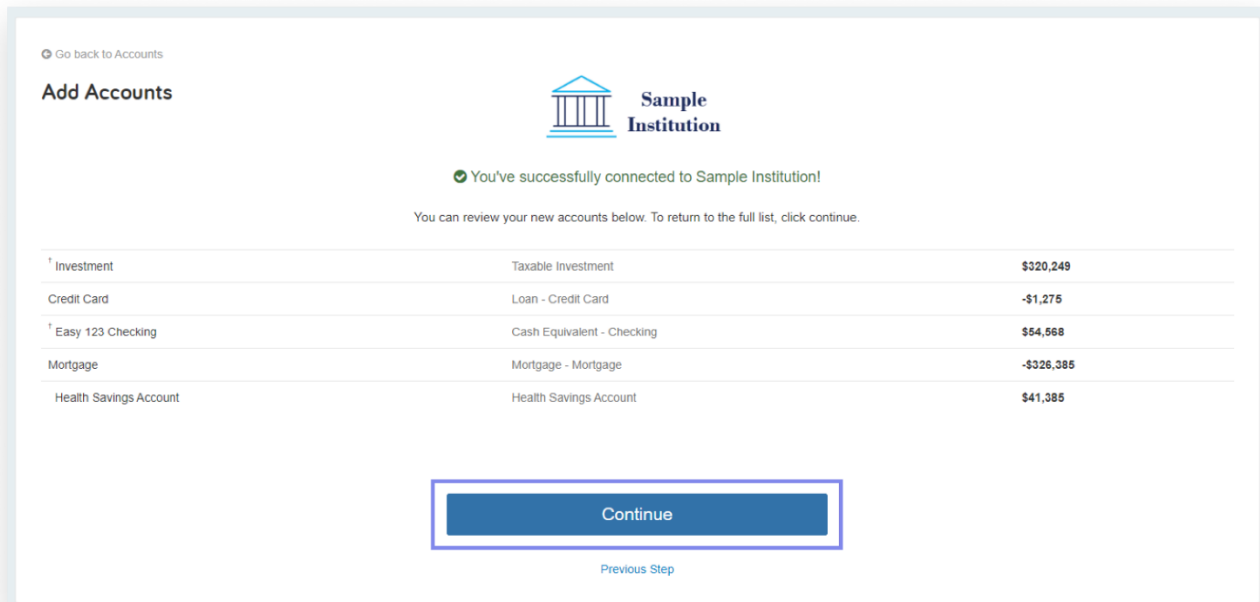

6. Enter your login credentials for this institution and click **Connect**.

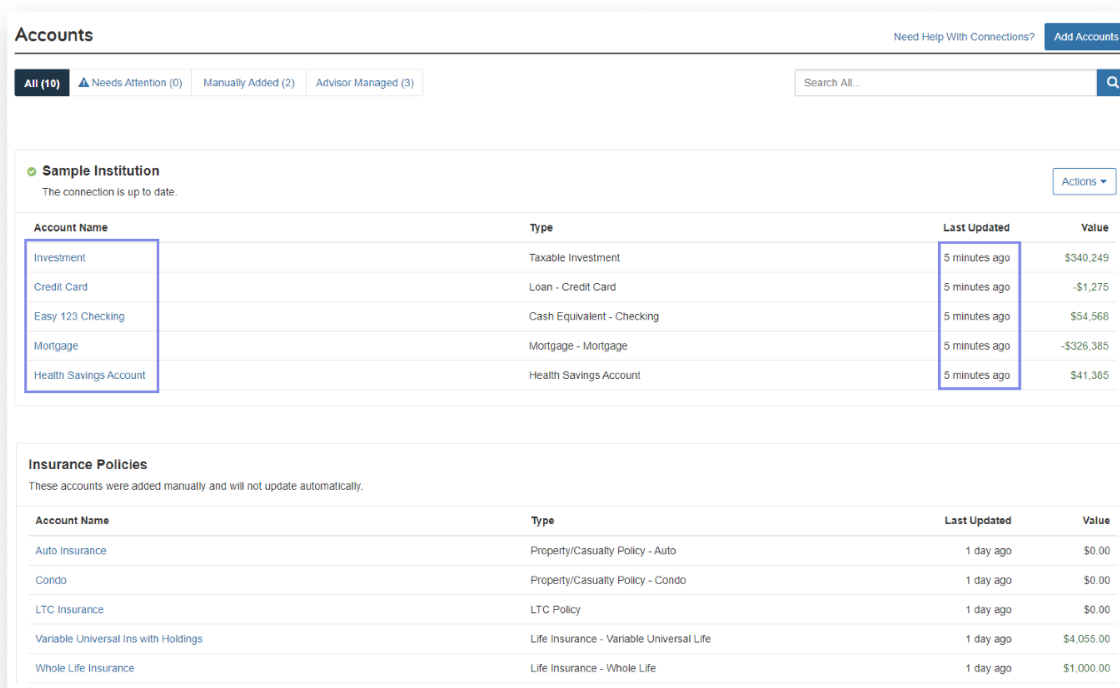

If there is an issue connecting to your accounts, you will receive a status message describing the problem, and you can click on the message to learn how to fix it.

7. Once your credentials have been verified, you can review the accounts brought over through the connection. Click Continue to return to an overview of all accounts you have entered in your portal.

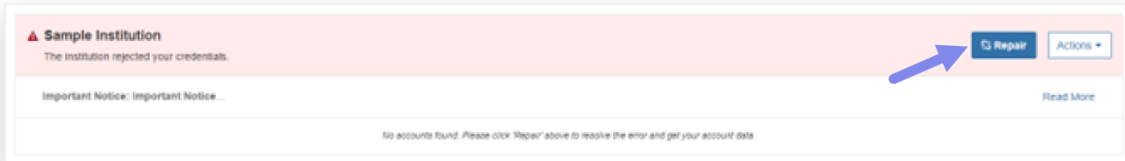

8. On the Accounts page, you can easily see when your accounts with an institution last updated or if any accounts are in an error state.

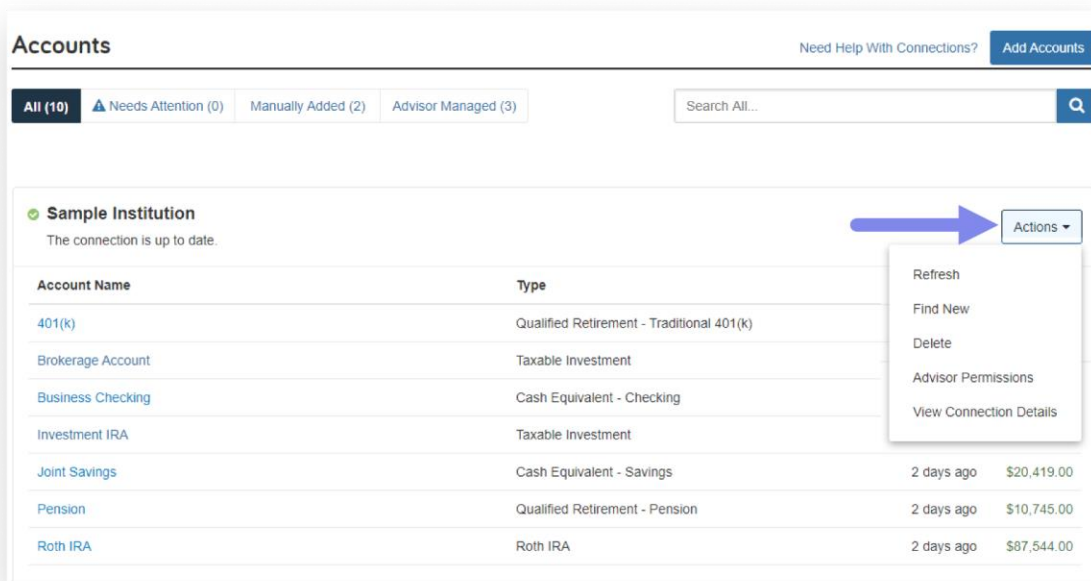

Connection Maintenance

Each connection you establish will require maintenance. For example, if you updated your password at the institution, you would need to update the credentials on the connection in your portal.

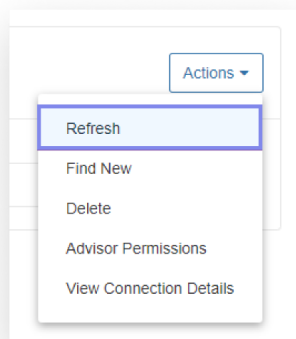

1. Errors that you can repair will appear with a Repair button that you can click to fix the issue.

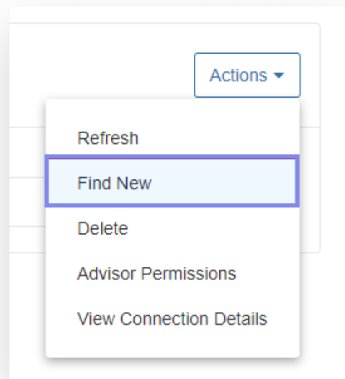

2. With the **Actions** menu, you can make a handful of selections to manage your Connections:

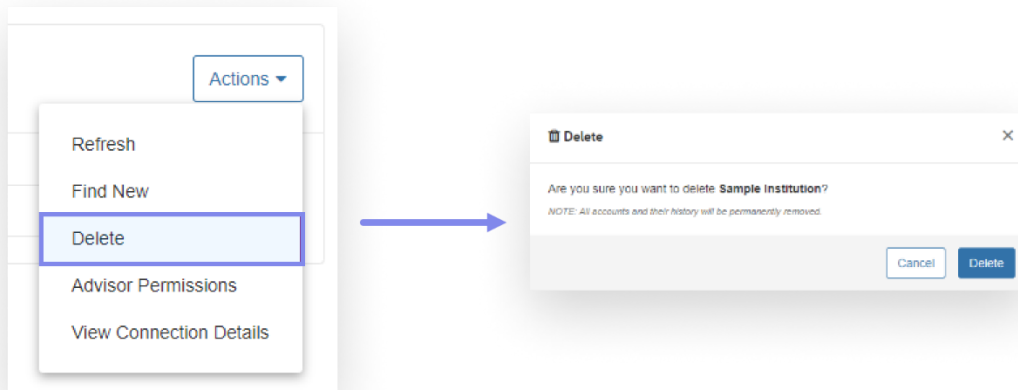

3. **Refresh** the connection anytime to pull over updated account values manually.

4. Select **Find New** to pull any new accounts opened after establishing the Connection.

5. Select **Delete** to remove the connection and all associated accounts.

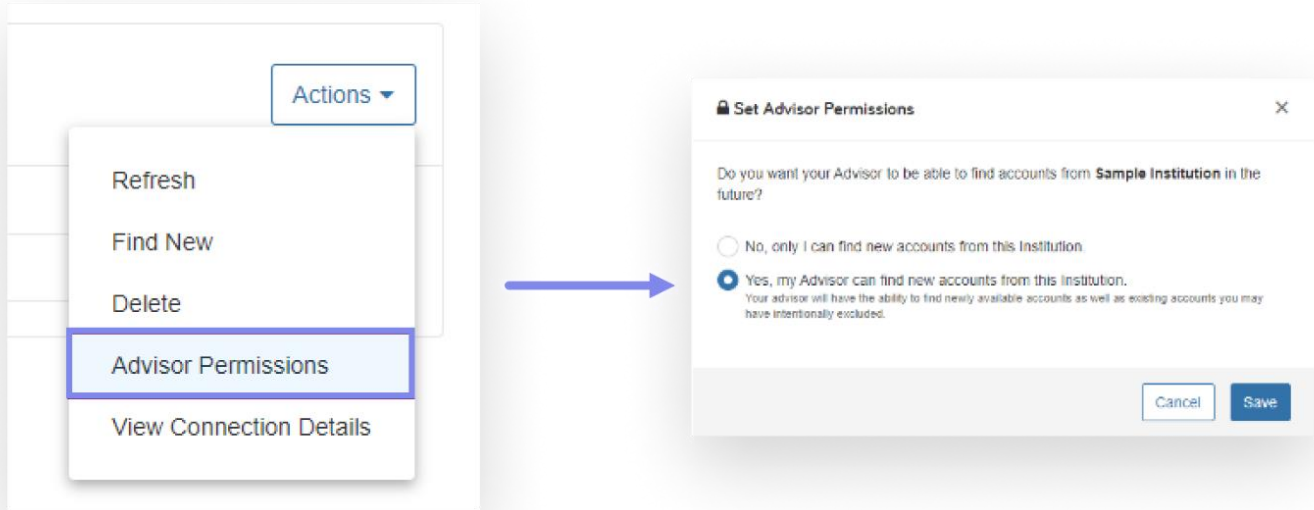

Note

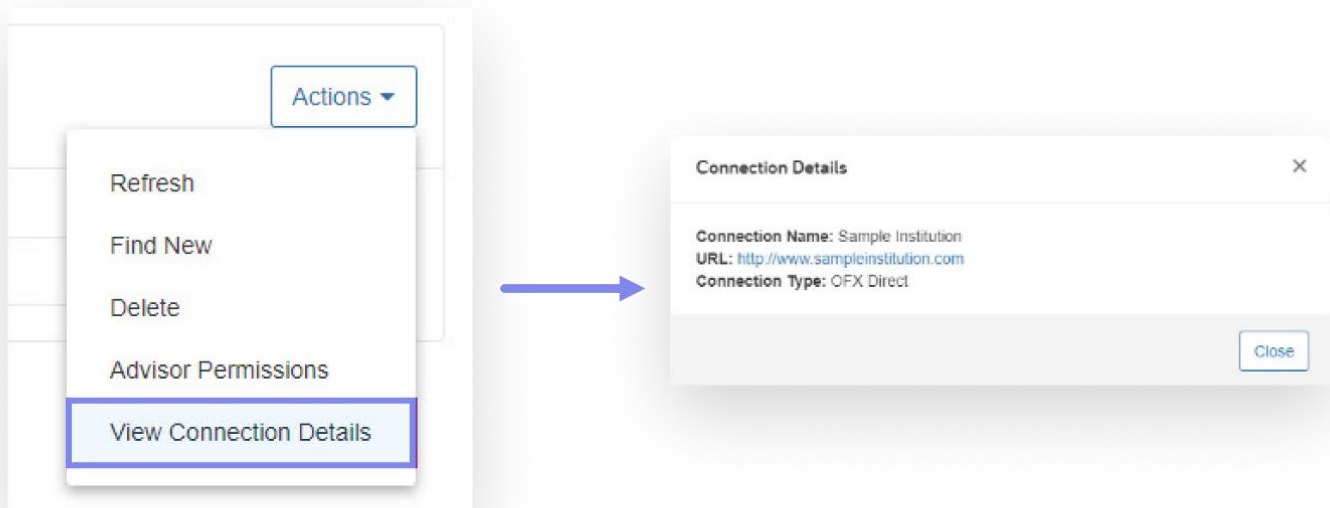

If you **Delete** the Connection, you will lose all accounts and transaction history. This is not recommended unless the connection and its accounts are no longer needed.

Add Accounts

6. The **Advisor Permissions** selection displays a popup that allows you to enable your Advisor to **Find New** accounts on your behalf.

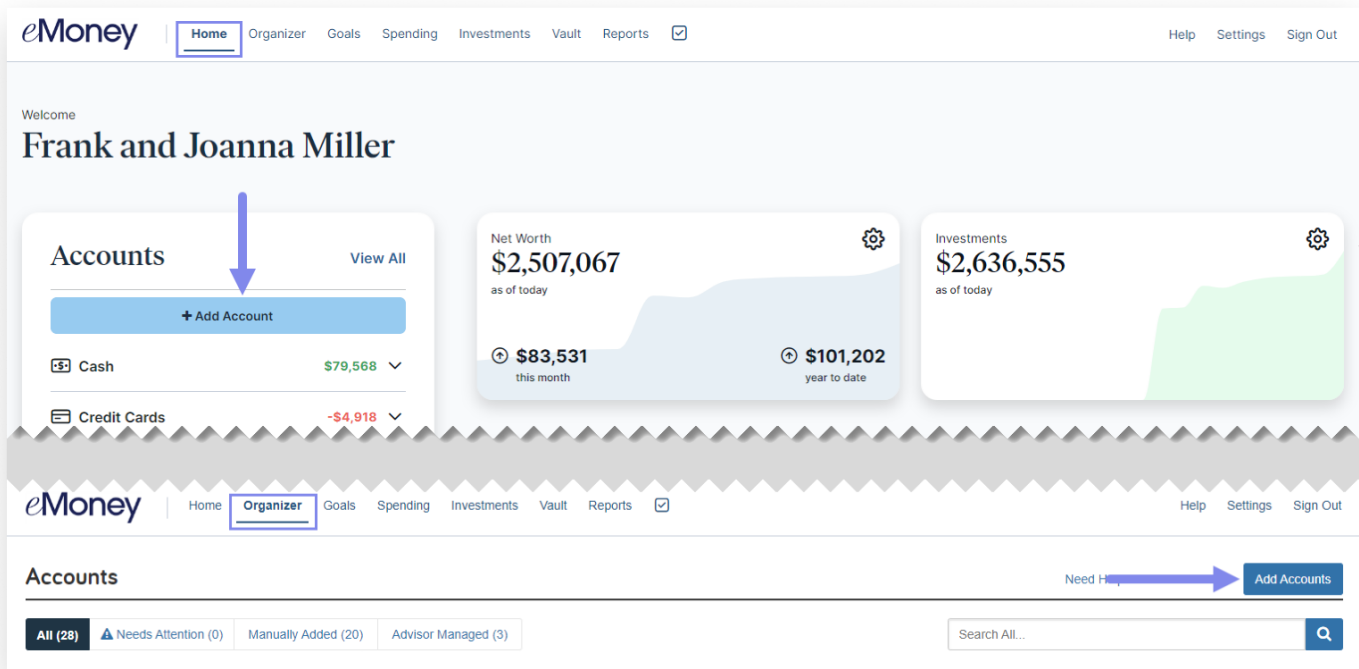

7. Select **View Connection Details** for the connection name, URL, and Connection Type.

Adding Manual Accounts

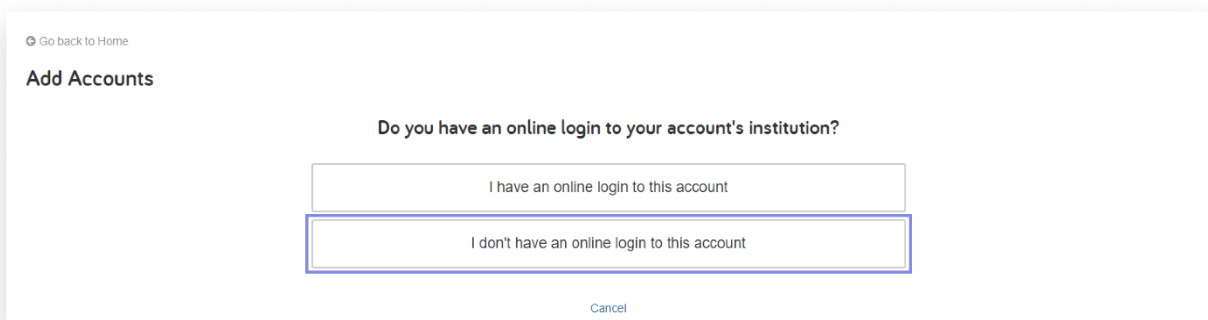

1. Click **Add Accounts** on the Home page or the Accounts page.

Note

If you do not have the following options, please contact your advisor.

2. Click **I don't have an online login to this account.**

3. Select the type of account.

What type of account is this?
