

Weekly Gains for Big Benchmark

Weekly Update – February 18, 2020

The Week on Wall Street

Daily headlines about the coronavirus had little impact on stock market averages last week. Earnings and mergers had more influence.

All three Wall Street benchmarks improved. The Nasdaq Composite rose 2.21%, outpacing the S&P 500, up 1.58%, and the Dow Jones Industrial Average, up 1.02%. The MSCI EAFE index, which tracks developed overseas equity markets, added 0.17%.

Jerome Powell Testifies on Capitol Hill

Commenting that the economy is in a “very good place,” Federal Reserve Chairman Jerome Powell told congressional legislators that he did not currently see a significant recession risk.

“There’s nothing about this expansion that is unstable or unsustainable,” Powell remarked during his semi-annual report to the House Financial Services Committee. He did reiterate that the central bank was “carefully” watching the coronavirus outbreak, and that it could “very likely” have residual economic impact on the U.S.

Yearly Inflation Reaches 2.5%

Consumer prices have not advanced to this degree since the 12-month period ending in October 2018. Underneath this January headline inflation number, core inflation (minus food and energy prices, which are often volatile) was up 2.3% year-over-year.

These numbers are from the Consumer Price Index, maintained by the Bureau of Labor Statistics. The Federal Reserve monitors inflation using its core personal consumption expenditures (PCE) index, which remains below the central bank’s 2% yearly inflation target.

Gains in Retail Sales, Sentiment

The Census Bureau said retail sales were up 0.3% in the first month of the year, matching the consensus forecast of analysts polled by MarketWatch. Additionally, the University of Michigan’s preliminary February consumer sentiment index monitoring consumer confidence factors went back above 100 last week (100.9).

Final Thought

The S&P 500 has risen more than 1% since the coronavirus surfaced. During the SARS epidemic of 2003, the MERS outbreak of 2013, and the 2015-16 Zika virus breakout, the index declined.

THE WEEK AHEAD: KEY ECONOMIC DATA

Wednesday: The Federal Reserve releases minutes from its January meeting, and the Census Bureau presents data on January residential construction activity.

Friday: The National Association of Realtors issues its latest existing home sales report.

Source: MarketWatch, February 14, 2020

The MarketWatch economic calendar lists upcoming U.S. economic data releases (including key economic indicators), Federal Reserve policy meetings, and speaking engagements of Federal Reserve officials. The content is developed from sources believed to be providing accurate information. The forecasts or forward-looking statements are based on assumptions and may not materialize. The forecasts also are subject to revision.

THE WEEK AHEAD: COMPANIES REPORTING EARNINGS

Tuesday: Medtronic (MDT), Walmart (WMT)

Wednesday: Analog Devices (ADI), NetEase (NTES)

Thursday: Dominos (DPZ), Hormel Foods (HRL), Southern (SO)

Friday: Deere & Co. (DE), Royal Bank of Canada (RY)

The market indexes discussed are unmanaged and generally considered representative of their respective markets. Individuals cannot directly invest in unmanaged indexes. Past performance does not guarantee future results. Weekly performance for the Dow Jones Industrial Average, Standard & Poor's 500 index, and NASDAQ Composite is measured from the close of trading on Friday, February 7 to the Friday, February 14 close. Weekly performance for the MSCI-EAFE is measured from the Friday, February 7 open to the Thursday, February 13 close. U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Weekly and year-to-date 10-year Treasury note yield are expressed in basis points. International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.

“Act as if what you do makes a difference. It does.”

– William James

Zippy French Toast

Serves 4

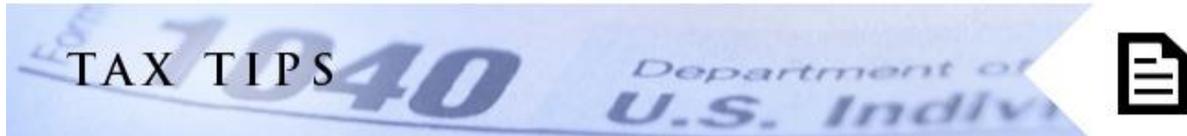

Ingredients:

- 1 tsp. cinnamon
- ¼ tsp. nutmeg
- 2 Tbsp. sugar
- 4 Tbsp. butter
- 4 eggs
- ¼ cup whole milk
- ½ tsp vanilla extract
- 8 slices of your favorite bread
- ½ cup warm maple syrup
- 2 cups berries or favorite fruit

Directions:

1. In large bowl, mix spices and sugar.
2. Add butter to skillet over medium heat
3. Beat eggs with milk, vanilla, spice and sugar mix.
4. One at a time, immerse each bread slice to the egg, and then fry each side in skillet.
5. Garnish with berries and add syrup.

6. Serving suggestion: Jam or preserves make a nice change from syrup and berries.

5 Facts About Capital Gains

When you sell a capital asset like an investment or a piece of property, the sale can result in a capital gain or loss. The IRS defines a capital asset as “most property you own for personal use or own as an investment.” Here are six facts you should know about capital gains:

1. A capital gain or loss is the difference between what you originally paid for the asset (your basis) and the amount you get when you sell an asset.
2. You must include all capital gains in your income, and you may be subject to the Net Investment Income Tax if your income is above certain amounts. Consult a qualified tax expert for help.
3. The IRS allows you to deduct capital losses on the sale of investment property. You cannot deduct losses on the sale of property that you hold for personal use.
4. If your total net capital loss is more than the limit you can deduct, you can carry it over to next year’s tax return.

The Myth of Always Hitting Your Regular Distance

H. Hugh Briss, who plays golf every weekend at the local country club, faces a 170-yard approach shot over a pond. When he’s going good, Hugh can hit a 6-iron 170 yards. He

selects his 6-iron. He hits it a little fat, and the ball plops into the water. Hugh, now peeved, was so confident he could reach the green.

Truth be told, Hugh was overconfident. He failed to account for a simple fact: we don't hit our regular distance all the time. Our approach shots often don't carry as far as we assume they will. When you really need to carry a hazard, take one club more than you think you might need. You might like the results. Remember, there is usually less trouble behind a green than in front of it.

Eating To Your Heart's Content

Deciding to change your diet can feel daunting. It can be difficult to figure out which one is "best" for you. Many fad diets come and go, but there are a few that have stuck around, the most popular being the Mediterranean diet.

The Mediterranean diet is less of a traditional diet and more of a lifestyle shift toward healthier eating patterns. It's modeled after principles of Italian and Greek cuisine, which have remained relatively unchanged since the 1960s. Consuming this diet has been correlated with lower rates of heart disease, type 2 diabetes, and other chronic illnesses. The diet emphasizes eating more fruits, vegetables, legumes, nuts, seeds, fatty fish, whole grains, and olive oil and fewer meats and dairy products. The diet is flexible. Elimination isn't the intention, rather balance more toward nutrient-rich foods versus energy-dense ones.

Food is life, and making healthy choices can help support a healthier life. While the Mediterranean diet could be a good option for someone, no single diet will fit everyone's lifestyle, preferences, and health needs perfectly. So, be sure to discuss any dietary choices you make with your physician or registered dietitian first.
