RE: Arch Global Advisors, LLC. ESG Portfolio Launch

Dear Clients,

Arch Global Advisors is excited to announce the launch of our firm's first ESG portfolio, developed to promote socially responsible and meaningful investing.

As investors have become increasingly interested in aligning their personal values with their investment objectives, our management committee constructed an allocation with these principals in mind. The Arch Global Advisors ESG strategy is a portfolio created specifically for you to take Environmental, Social, and Governance Issues into consideration. The ultimate aim of the portfolio is to provide clients with an opportunity to participate in sustainable investing, while not sacrificing returns. For example, it will include companies who look to decrease carbon emissions, promote equal employment opportunities and apply ethical business practices with concern for all stakeholders. In short, ESG investing considers the "big picture". This portfolio will be monitored and maintained by the same team responsible for our highly successful Asset Track Program™.

ESG investors are looking toward creating a better future and so is Arch Global Advisors. If you are interested in learning more about the AGA ESG Portfolio, please feel free to reach out to your financial professional.
