Compensation Options:

Fee Only - Fees are estimated based on the time and complexity of the planning needs and billed based on actual time consumed. Additional compensation is not anticipated, but may be generated through commissions and/or referral fees if the client subsequently chooses to transact investment, insurance, and other financial products through us. This option will appeal to consumers who choose to engage us for planning but implement on their own.

Fee Offset - Fees are estimated based on the time and complexity of the planning needs but intended to be reduced to reflect any commissions or referral fees received for transactions on investments and other financial products that are expected to be undertaken as a part of the implementation of the action plan. To comply with insurance regulations, the fee-offset calculation only includes fees earned on investment assets outside the realm of the Insurance Act. This is used when the client chooses to engage us for planning but is unsure about how they wish to implement.

Embedded Fees - When you deal directly with a financial institution, employee salaries are built into the cost of the products you purchase. Similarly, when you deal with an independent advisor, compensation is built into the cost of the product but paid as a commission and/or referral fee rather than a salary. However, these revenues will only be received if our services result in the placement of investment, insurance, and other financial products as part of the implementation of the action plan. This is the most common option where a client chooses to fully engage for both planning and implementation.

A fee of \$_____ will be payable for the services covered by this agreement. This fee will be payable 50% due immediately upon execution of this agreement and 50% due upon presentation of the plan.

A legible copy shall be as valid as an original.

The client has read the preceding provisions, understands the nature of this agreement and agrees to its terms.
