Performance data quoted represents past performance. Past performance does not guarantee future results. All performance assumes reinvestment of dividends and capital gains. Returns shown above that cover a period of one year or more are annualized. The investment return and principal value of an investment will fluctuate so that investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. The Fund imposes a 1% redemption fee on shares redeemed within 180 days of their purchase. See the Fund's current prospectus for more information on the Fund's redemption fee. The performance information above does not reflect the imposition of the redemption fee. For performance information current to the most recent month end, call 1-888-859-5856.

The expense cap for the Fund contractually limits ordinary operating expenses to not more than 1.25% (exclusive of the Fund's Rule 12b-1 fees) of the average daily net assets of the CM Advisors Small Cap Value Fund until July 1, 2020. The Russell 2000 Value Index ADJ measures the performance of the small-cap value segment of the U.S. equity universe. It includes those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Value Index is constructed to provide a comprehensive and unbiased barometer for the small-cap value segment. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect value characteristics. It is not possible to invest directly in the index.

Investment Strategy

The investment seeks long-term growth of capital. The fund invests primarily in equity securities of small capitalization companies ("small cap") that the Advisor believes are undervalued. Under normal circumstances, at least 80% of the fund's net assets (including the amount of any borrowings for investment purposes) will be invested in small cap equity securities, which may include shares of other RICs, such as ETFs, that invest primarily in small cap equity securities. It typically invests in common stocks, although it may also invest in other equity securities.

CM Advisors Small Cap Value Fund composition is subject to change.

The Morningstar Style Box is a nine-square grid that provides a graphical representation of the "investment style" of stocks and mutual funds. For stocks and stock funds, it classifies securities according to market capitalization (the vertical axis) and growth and value factors (the horizontal axis). **Investors should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. The prospectus contains this and other information about the Fund. You may obtain the prospectus by visiting www.cmadvisorsfunds.com or calling 888.859.5856. The prospectus should be read carefully before investing.**
