

Business Continuity Plan

FSB Premier Wealth Management, Inc. [*FSB Premier*] maintains important disaster recovery and business continuity plans that we can activate in the event of a significant business disruption. We realize the critical nature of being able to continue material operations if an incident occurs that could affect mission-critical business units and systems. These plans are key components in maintaining emergency procedures and are required by securities industry regulations.

In planning for potential significant business disruptions, our team has studied a number of outcomes from varying scenarios. Some examples of this include but are not limited to disruptions to a single building, a citywide business disruption, a regional disruption, and more. Our plans should allow us to continue key business operations during most types of disruptions by resuming mission critical operations, usually within the same business day as the disruption. To assist with business continuity, we maintain backup technology processing capabilities in alternate, secure locations. In cases of an extreme disruption, where the continuation of business may not be practical or in the best interest of FSB Premier or its clients, we have implemented steps necessary to allow clients prompt access to their funds and securities.

Please be aware that because the firm's plans contain details of a confidential and proprietary nature, we may not share our current plan with the public. You should also note that our business continuity plan is subject to modification, and periodically changes, as is permitted by applicable law.

Notice of SIPC Coverage

Per FINRA Rule 2266, FSB Premier Wealth Management, Inc. is required to inform all of our clients that they may obtain information about SIPC, including the SIPC brochure, by contacting SIPC online via its website (www.sipc.org) or by telephone (202-371-8300).
