

The Roadmap to Abundant Wealth

Start the car: Pay yourself from your business

You have to pay yourself regularly from your business to even *start* your journey towards abundant wealth. Only 51% of small business owners pay themselves a salary, and only 48% of small business owners have a retirement savings plan. Paying yourself is the first step towards building the abundant wealth you desire!

Fill your tank: Create a 9 to 12 month Emergency Fund for your business

62% of women-owned business have less than 3 months of cash on hand for an emergency. Build your emergency fund to at least 9 months of operating expenses to protect your business during a crisis.

Set your GPS: Hire a team to take the guesswork out of financial planning

84% of business owners are *concerned* about retirement planning, but only 22% *have* a written retirement plan. Having a financial advisor, accountant, and bookkeeper to support you with daily and long-term financial planning will allow you to build wealth while spending less time thinking about finances!

Hit the open road: Save regularly from your owner's pay to build your legacy

- ✓ You're paying yourself regularly.
- ✓ You're building your emergency fund.
- ✓ You have a financial team in place.
- ✓ You've opened the right retirement plans for your business.

Now it's time to save regularly and watch your wealth grow faster than you ever imagined it could!
