"Nothing differentiates a business more than the people who contribute to its success."

Jay Pestrichelli, Founder & Executive Chairman

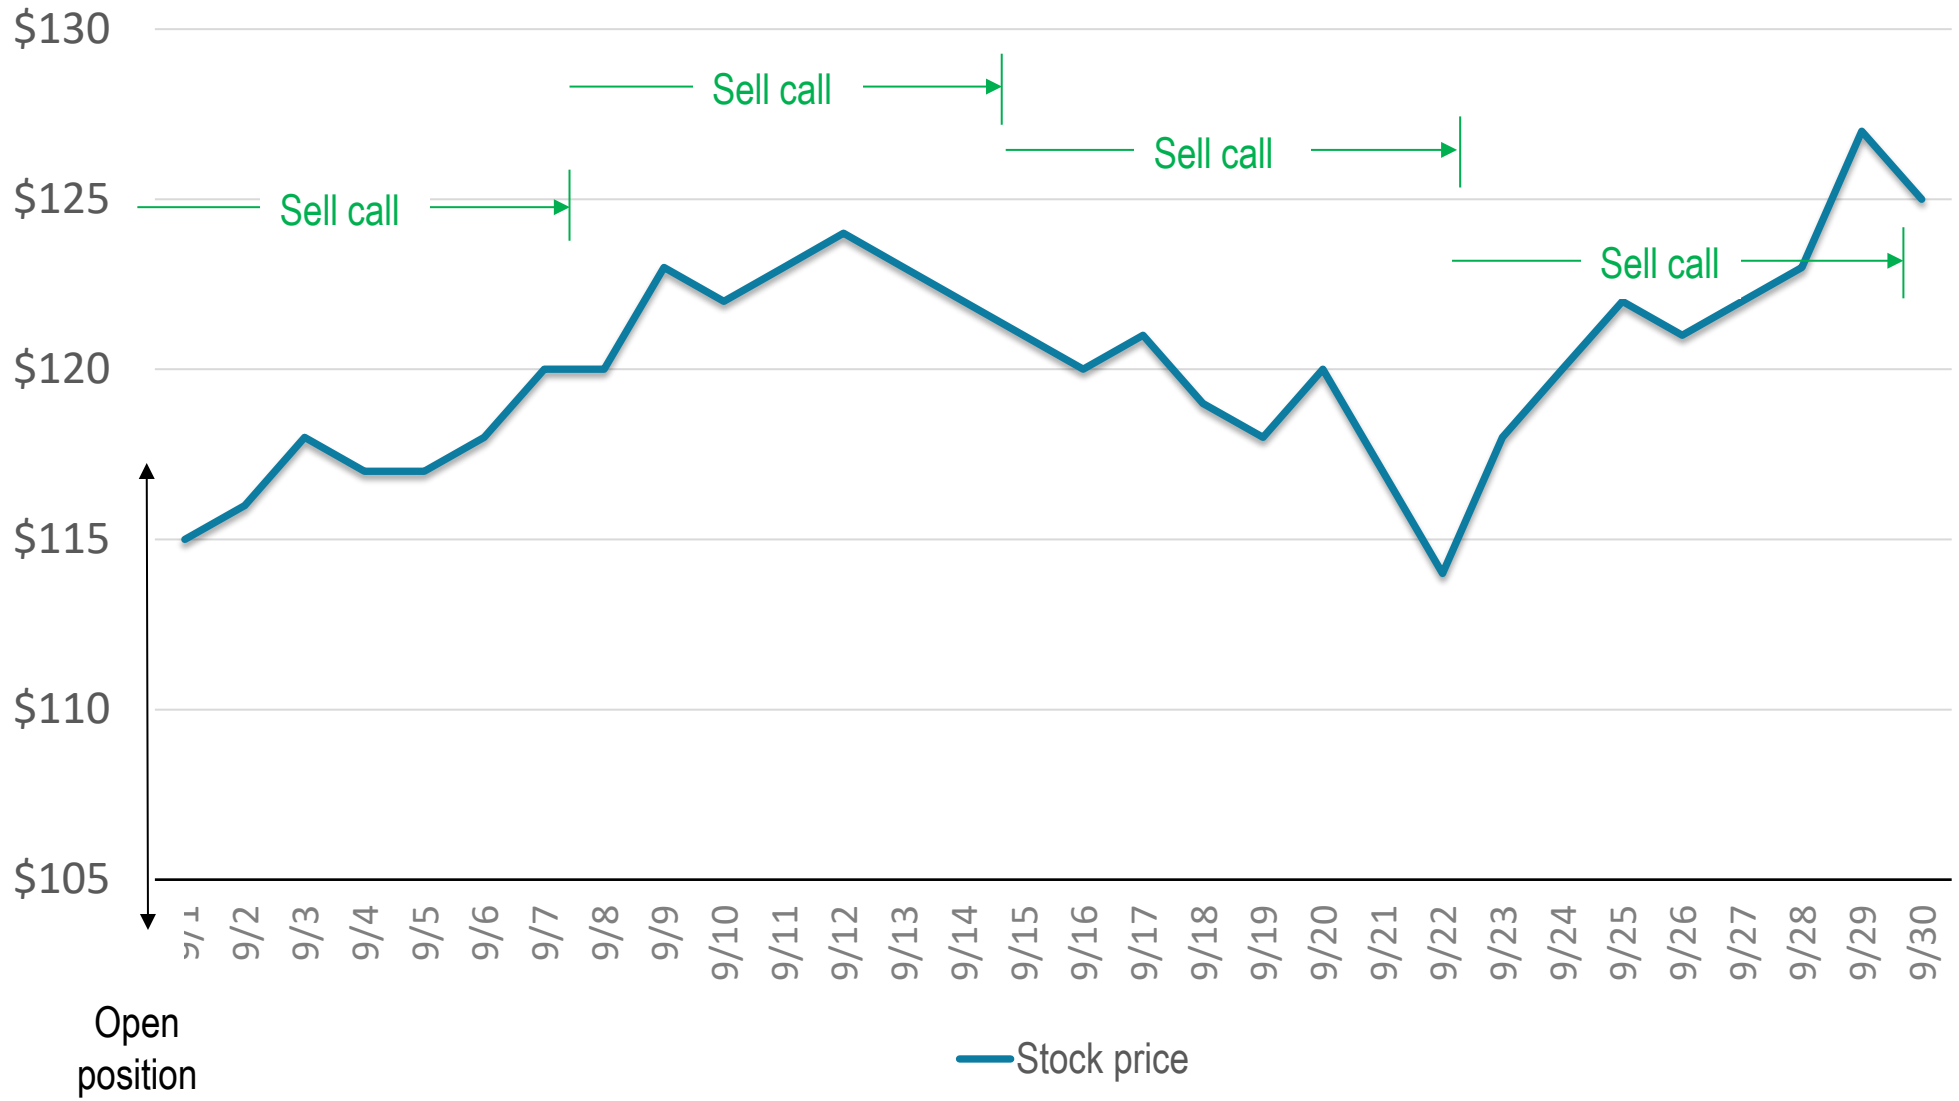

ZEGA INVESTMENTS

Dividend Max – Basket of ETFs for Alt Income

- Actively managed **Basket of ETFs** constructed with options on a single ticker with the intention of **delivering outsized dividend yields**.
- Strategy designed to **convert option volatility** to cash flow
- Using short-term and near-the-money **option selling,** Puts, Calls or Spreads. The strategy looks to **take advantage of the natural time decay** of options
- Some positions may use a **replication of a covered call** strategy.

ZEGA INVESTMENTS

A review of Covered Calls

ZEGA INVESTMENTS

Portfolio Composition of ETFs

1. Short Put + Long Call = Long Stock Position
2. Short Call = Income
3. Treasuries = Collateral & Additional Income

Synthetic Covered Call

Results:

- Covered call strategy
- Monthly income potential
- Short out-of-the money call allows some upside participation
- All options are backed by the Options Clearing Corporation (OCC)
- No leverage
- No stock gets called away

ZEGA INVESTMENTS

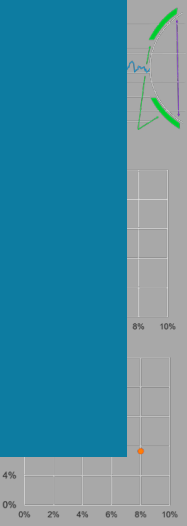

ETF Dividend Max

- Dividend Max : **Holds high dividend yielding ETFs** that primarily institute synthetic covered calls, covered call strategies or other options tactics.
- Funds **generate income** from a combination of selling covered call premium and any available capital appreciation
- Diversify Across **Stocks, Commodities and Bonds**
- High Income Focused

Target Yield of:

up to

30%+

Risks

- Portfolio should move inline with a **70/30 portfolio** or a **90/10 portfolio**
- The covered call ETFs are not downside protected
- Some of the ETFs are invested in **tech stocks**, tech stocks can be more volatile than the S&P500 at times
- If the portfolio uses margin, the fluctuation in value will magnify by the percentage of leverages used. For example, a portfolio with 50% margin balance will fluctuate 100% more than a non-margined account

ZEGA INVESTMENTS

Use Case: ETF Build Enhancement

Adding a slice of income to an ETF build

	Allocation	Yield	Volatility
ETF Dividend Build	100%	4%	20%
ETF Dividend Build	75%	4%	20%
ZEGA ETF Dividend Max	25%	35%*	50%**
Weighted Result		11.75%	24.5%

*Assuming 50% Yield (Target)

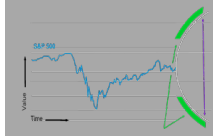

**Assuming Volatility of 30%

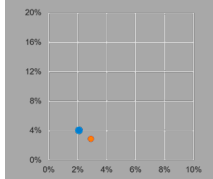

For clients who can handle the increase in volatility, the dividend can almost triple with a 25% Dividend Max allocation

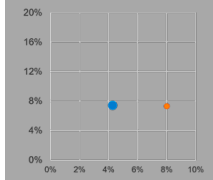

ZEGA INVESTMENTS

ZEGA ETF Dividend Max Summary

- **High Income** Focus
- **Dividend yield is different than Total Return**
- ETFs carry same **downside risk** of stocks, minus options premium
- Diversify Across **Stocks, Commodities and Bonds**
- Strategy does **not need options or margin approval**
- Strategy can be run in UMA or SMA format
