

5-Star Morningstar Rating Disclosure:

- Morningstar Ratings are no guarantee of future investment success. Investing in a highly-rated fund does not ensure that a client or investor will experience a higher level of performance. Additional information regarding Morningstar ratings are available by contacting the adviser.
- The Morningstar Rating™ for funds is calculated for funds with at least a three-year history. It is calculated based on a Morningstar risk-adjusted return measure that accounts for variations in a managed product's monthly excess performance, which rewards consistent performance and emphasizes downward variations. The top 10 percent of funds in each category receive 5 stars, the next 22.5 percent receive 4 stars, the next 35 percent receive 3 stars, the next 22.5 percent receive 2 stars, and the bottom 10 percent receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-year, five-year, and 10-year Morningstar Rating metrics, if applicable.
- All investment strategies have the potential for profit or loss. Changes in investment strategies, contributions or withdrawals, and economic conditions may materially alter the performance of your portfolio. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment or strategy will be suitable or profitable for an investor's portfolio. Historical performance results for investment indexes and/or categories generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment-management fee, the incurrence of which would have the effect of decreasing historical performance results. There are no assurances that an investor's portfolio will match or outperform any particular benchmark.
